## First Quarter 2023 Report to Shareholders

Kingston, Jamaica - February 2, 2023

The Board of Directors approved the release of the following financial results for NCB Financial Group Limited (NCBFG) and its subsidiaries for the quarter ended December 31, 2022.

NCBFG reports unaudited consolidated net profit of \$1.4 billion for the quarter ended December 31, 2022, a 75% or \$4.0 billion decline from the prior year. Consolidated net profit attributable to stockholders of the parent totalled \$836 million, a decrease of \$1.8 billion or 68% from the prior year.

For this financial year we expect the Group may encounter challenges from the potential effects of several headwinds including geopolitical tensions, possibility of a global recession, and continued inflation leading to higher interest rates. This environment will test the resilience of our business model and diversified segments, however we remain steadfast as we execute strategic imperatives to serve our customers and strengthen the Group. As we pursue the accomplishment of our strategic aspirations, we continue to be dynamic and agile to seize opportunities that typically arise in challenging environments.

Continuation of our digital transformation journey is a top priority aimed at further enhancing customer experience, optimising operational processes and continuously improving our business model. Offering innovative financial solutions is a key hallmark in our pursuit of empowering people, unlocking dreams and building communities.

## Group Performance

The Group's performance for the quarter declined primarily as a result of events in our life, health, and pension (LHP) insurance segment, in particular the effects of a one-off actuarial adjustment. Operating income of \$29.6 billion declined by \$4.4 billion or 13%, predominantly resulting from a reduction in net revenues from insurance activities. This was partially offset by operating expenses declining by 3% due in part to our cost optimisation initiatives.

The decreased revenues led to lower profitability impacting some of our key performance indicators when compared to the prior year. Return on assets (ROA) and return on equity (ROE) (annualised) declined to 0.26% down from 1.09% and 2.08% down from 6.49%, respectively. Adjusting the annualised ROA and ROE for the one-off event, the ratios would be 0.81% and 9.21%, respectively. The rolling twelve-month ROA and ROE were 1.74% and 15.18%, respectively. The cost to income ratio also increased to 83.49% up from 75.25% in the prior year due to the reduction in revenues.

## Banking and Investment Activities

Net revenues from banking and investment activities of \$27.0 billion increased by 9% or \$2.3 billion over the prior year's performance. There was steady improvement in the core revenue lines driven by growth in our loans and investments portfolios and increased transaction volumes.

## Insurance Activities

The net revenues from insurance activities totalled \$2.7 billion, a decrease of 71% or \$6.6 billion from the prior year. The one-off actuarial adjustment of approximately \$3.5 billion combined with additional reserve movements from our periodic assumption updates were the main causes of the quarter's decline in performance.

## Operating Expenses

Operating expenses totalled \$26.3 billion, declining by \$696 million or 3% from the prior year. There were lower credit card rebate expenses, professional fees and consultancy charges in the quarter compared to the prior year's first quarter. These decreases were partially offset by an 11% increase in asset tax to \$2.3 billion for the quarter. We will continue to pursue cost optimisation initiatives while continuing our digital investments as we focus on enhancing customer experience and improving operating efficiency.

## Consolidated Statement of Financial Position

Total assets rose to \$2.11 trillion, an increase of 4% or \$80.0 billion over the prior year. The growth in the asset base was mainly due to increased loans and investment securities. The growth was mainly funded by increased deposits, repurchase agreements, and obligations under securitisation arrangements.

## Investment Securities and Reverse Repurchase Agreements

Investment securities, including pledged assets and reverse repurchase agreements, exceeds \$1.0 trillion, an increase of 5% or \$45.7 billion over the prior year. This continues to be the Group's largest earning asset portfolio.

## Loans and Advances

The Group's loans and advances, net of credit impairment losses, totalled \$593.0 billion, an increase of 8% or \$43.5 billion over the prior year. Non-performing loans totalled \$26.0 billion as at December 31, 2022, declining by \$7.0 billion or 21% from the prior year. The reduction in non-performing loans led to an improvement in our non-performing loan ratio, decreasing to 4.3%, from 5.9% in the prior year.

## Deposits

Banking customers continue to show confidence in the Group, evidenced by a 5% or \$31.2 billion increase in deposits to \$716.9 billion, our largest source of funding.

## Policyholders' Liabilities

Liabilities under annuity and insurance contracts decreased to \$435.4 billion, down 4% or \$16.3 billion from the prior year.

## Capital and Liquidity

Equity attributable to stockholders of the parent totalled \$172.2 billion, an increase of \$8.3 billion or 5% over the prior year. During the quarter there was a reduction in fair value losses for the Group due to the reclassification of specific investment securities to the Hold to Collect portfolio to correctly align with our business model.

## Dividends

The Board of Directors, at its meeting on February 2, 2023, decided not to pay an interim dividend.

## Environment, Social and Governance (ESG)

In the current financial year, we will continue work on our ESG strategy, roadmap, policy and framework. Our objective is to engage in activities that support long-term success, providing appropriate benefits for various stakeholders and ensuring compliance with all applicable rules and regulations through responsible and ethical business practices. We will also engage in business strategies that positively impact society and the environment, contributing to the development of more sustainable and inclusive economies.

One such initiative is the support provided to our customers for green financing for renewable energy, clean technologies, conservation and waste and water management projects. The Group also continuously embarks on environmentally conscious practices to aid in reducing our environmental impact and drive sustainability.

To advance our commitment to empowering people, unlocking dreams and building communities, we continue to fund initiatives through our Foundations geared towards improving the well-being of individuals in the communities we serve and the wider society.

Through our Lynk mobile wallet we also seek to increase financial inclusion by providing easy access to practical payment options. This provides the Jamaican society with a digital solution and access to financial services. As we continue to digitise our business, cyber-security continues to be a top priority for us, as we protect customer data and strengthen our systems and information security.

We will continue to provide a safe and secure environment for our customers and other stakeholders to conduct business with the Group. We are grateful to our valued stakeholders, including our team members, for their continued loyalty, confidence and support.

*NCBFG – Empowering People | Unlocking Dreams | Building Communities.*

ON BEHALF OF THE BOARD

Hon. Patrick Hylton, OJ, CD, President and Group Chief Executive Officer

### 1. Identification and Principal Activities

NCB Financial Group Limited ("the Company") is a financial holding company, incorporated and domiciled in Jamaica. The Company is 52.72% (December 31, 2021 - 52.67%) owned by AIC (Barbados) Limited. The ultimate parent company is Portland Holdings Inc., incorporated in Canada. Portland Holdings Inc. is controlled by Hon. Michael A. Lee-Chin, O.J., Chairman of the Company.

The Company's registered office is located at 32 Trafalgar Road, Kingston 10, Jamaica.

The Company's ordinary stock units are listed on the Jamaica Stock Exchange and the Trinidad and Tobago Stock Exchange.

### 2. Basis of preparation

The condensed consolidated interim financial statements (interim financial statements) for the quarter ended December 31, 2022 have been prepared in accordance with IAS 34, 'Interim financial reporting'. The interim financial statements should be read in conjunction with the annual financial statements for the year ended September 30, 2022 which have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group's accounting policies.

### 3. Segment reporting

The Group is organised into the following business segments:

- Consumer & SME banking – This incorporates the provision of banking services to individual and small and medium business clients.
- Payment services – This incorporates the provision of card related and digital/electronic payment
- Corporate and commercial banking – This incorporates the provision of banking services to large corporate clients.
- Treasury & correspondent banking – This incorporates the Group's liquidity and investment management function, management of correspondent bank relationships, and relationships with other financial institutions as well as foreign currency
- Wealth, asset management and investment banking – This incorporates stock brokerage, securities trading, investment management and other financial services provided by certain overseas subsidiaries.
- Life and health insurance & pension fund management – This incorporates life and health insurance, investment and pension fund management services.
- General insurance - This incorporates property and casualty insurance services.
- Other/Consolidation Adjustments - The Group's trustee services, property development and the outstanding transactions and balances of certain inactive subsidiaries and the parent company are classified as Other for segment reporting. Eliminations comprise inter-segment transactions and adjustments on consolidation of the financial statements are also included in this segment.

### 4. Macro-environment update

Global growth is slowing sharply in the face of elevated inflation, higher interest rates and disruptions caused by Russia's invasion of Ukraine. The global economy is projected to grow by 1.7%<sup>1</sup> in 2023 down from the estimated growth rate of 2.9% in 2022. The downturn in growth is expected to be widespread, with forecasts in 2023 revised down for 95% of advanced economies and nearly 70% of emerging market and developing economies. Growth in Latin America and the Caribbean is expected to slow to 1.3% in 2023, down from 3.9% in 2022.

All of our operating territories are expected to see positive real GDP growth in 2023, though lower than 2022 levels. Jamaica is expected to lead with 2.9% in 2023, followed by Bermuda (2.8%), Barbados (2.4%), Trinidad and Tobago (T&T) (1.9%), and, Cayman Islands (1.0%)<sup>2</sup>. Tourism-dependent operating territories will continue to benefit from the recovery in global travel, and its spillover to other sectors. According to the most recent UNWTO<sup>3</sup> World Tourism Barometer, more than 900 million tourists travelled internationally in 2022, double the number recorded in 2021, though still 63% of pre-pandemic levels. However, forward-looking scenarios for 2023, indicate that international tourist arrivals could reach 80% to 95% of pre-pandemic levels this year, buoyed by a strong winter season supported by the release of pent-up demand for travel. However, this will depend on the extent of the economic slowdown, the ongoing recovery of travel in Asia and the Pacific and the evolution of the Russian offensive in Ukraine, among other factors. This growth will be buttressed by increased airlifts, reduced fear around travelling, removal of restrictions, especially in China, and strong labour markets in some source countries. For other territories, such as T&T, still high energy prices, though lower than 2022 levels, will incentivise higher energy production, thus driving growth. Improved employment numbers will also buttress private consumption and therefore economic expansion. However, there are risks to these forecasts. There is a 70% chance of a recession in the US, and similarly, high probabilities across Europe which may affect global demand for goods and services. This may put pressure on the tourism industry, which would adversely affect most countries across our operating territories as well as put downward pressure on energy prices. This is a downside risk to all operating territories' growth prospects.

<sup>[3]</sup> UNWTO - The World Tourism Organization is the United Nations agency responsible for the promotion of responsible, sustainable and universally accessible tourism.

#### 4. Macro-environment update (continued)

Although our operating environments face similar risks from the global economy, such as high inflation and interest rates, the growth outlook for 2023 remains positive. More widespread reopening of key economies should keep economic growth positive, albeit lower than in 2022. The high inflation and interest rate environment have fuelled, and should continue to fuel, greater net interest and fee and commission income in the banking sector. However, slower expansion and still high rates could weigh on demand for loans, tempering the increase. Securities dealers could see an improvement in trading gains as 2023 is forecasted to be the year for bonds given that interest rates are expected to peak in the first half of 2023, following an anticipated pause in rate hikes from major central banks, including the US Fed. This bodes well for bond prices. However, the extent of the rebound may be tempered by recession concerns that still exist. Additionally, tight liquidity conditions will continue to be a headwind to this business line. However, because of their ability to hedge against inflation, demand for new alternative investment products should increase, boosting fee and commission income. Furthermore, high debt costs will make equity financing more attractive supporting increased IPOs, APOs<sup>4</sup>, and cross-listings on the Jamaica Stock Exchange. However, the size of these transactions could be limited by tight JMD liquidity and the attractiveness of valuations considering the risks in the environment. In our insurance business, with global interest rates anticipated to increase further before a pause, this should continue to reduce the assets and liabilities of life insurers. However, the net effect is expected to be positive because the impact on the value of liabilities is expected to be greater. This is because their liabilities have a longer duration and are therefore more sensitive to interest rates relative to their assets which are of a shorter duration. Despite lingering headwinds, the Group will continue to capitalise on emerging opportunities, while attempting to mitigate existing and emerging risks.

<sup>4</sup> IPOs - Initial Public Offerings and APOs - Additional Public Offerings
